Central Alert™ CA-360H

The Multi-function Notification System For Hotel ADA Kits

Model
CA-360H

CentralAlert™ Model CA-360H is the ideal notification system for your hotel ADA kits. It has a big alarm clock and it notifies the guest to the ringing of the in-room telephone and the knocking at the door. It is compact and easy to set up, just plug and use.

Features:

- Big and bright built-in alarm clock.

- It alerts guest to alarm clock, telephone ringing and knocking at the door.

- It also alerts the guest to the in-room smoke detector.*

- It uses a bright flasher, a loud audible tone and a bed shaker to notify the guest.

- Bright clear icons displaying the source of alerts.

- Easy to use and durable door hanging door-knocking sensor.

- Smart-code technology ensures no interference by nearby systems.

- Bed shaker included.

- Battery backup during power outage (batteries not included)

- Totally wireless; it's ready right out of the box.

*Optional Audio Alarm Sensor (CA-AX) is needed for audio pick-up or hard-wiring to the smoke detector. Check with local government agencies for ADA compliance requirements.

Wireless Door-Knock Sensor
1. Slide switch (on the side) to "ON".
2. Hang unit on door-knob (interior side of door) so the sponge is making contact with the door.
3. Door knocking activates a wireless "Flasher / Bed Shaker", alerting you someone is at the door.

CA-360H
Includes a Master Unit, Door-Hanging Door Knocking Sensor, and Bed-Shaker.
