

EarDoc

Hearing Aid Dryer - Protect Your Investment

At Sonic Alert we know the most common problems with hearing aids and PSAP's is the negative effect that moisture and earwax will have on your device. We researched many types of hearing aid dryers and found the most effective dryer available

Care for and protect one of the most valuable investments with confidence using the EarDoc hearing aid dryer. This dryer will remove unwanted moisture from your hearing device gently improving the performance and life of your PAL for years to come.

The EarDoc is designed to help eradicate the moisture from Hearing Aids through gentle heating of the Hearing Aid and through natural convection causing the moisture to evaporate. The daily use of your EarDoc will reduce moisture and make your Hearing Aids last longer and function at their best.
