

HomeAware™ Complete Home Alerting Solutions

HA360MK

Sonic Alert is extremely proud to introduce the new HomeAware™. This complete home alerting system has been designed with a digital-RF technology to provide the safest and most reliable method of sending and receiving a wireless signal.

The HA360M Main Unit incorporates safety, security and peace of mind. Each time a transmitter sends a signal, the alert message will scroll across your HA360M display, such as DOOR, PHONE, etc. No matter the degree of your hearing or visual challenges, you are sure to be alerted with the 110 dB extra-loud alarm, powerful bed shaker and the large 2 inch notification alert scrolling on the display.

Additional receivers will extend the range another 1,000 feet, and so on. By adding the new HA360BU SonicBridge unit, HomeAware™ is the only wireless system that is compatible with all existing Sonic Alert remote receivers.

Features

- Choose to be alerted by just one or all: 110dB alarm, power bed shaker and flashing ultra-bright strobe light
- Scrolling alert messages are shown on a bright red large 2 inch display
- Powerful bed shaker
- Dual alarm clock with alarm and snooze duration
- Compatible with all traditional and new HomeAware™ receivers
- Smoke and carbon monoxide detection
- Monitoring of low batteries and broken links between Main Unit and transmitters
- Caller ID for landline and videophone calls
- Doorbell transmitter can be hardwired into existing A/C powered chime or used as a doorbell button
- USB plug charges your cell phone while you sleep
- Full battery back up
- One-year Sonic Alert® warranty
