underPillow™ SleepSound Audio System

Model PS200SER

NEW

Great for your Tinnitus Programs

- ultra slim, hi-fi speaker slides under pillow
- Play music or built-in nature sounds
- Foreign language learning tool
- 1 hour timer decreases volume as you fall asleep

The underPillow™ SleepSound System is a device designed to help you sleep well – it's that simple. Whether you suffer from tinnitus or just have a hard time falling asleep, our underPillow™ SleepSound System will help soothe your nerves and enable you to drift off to sleep. You can even use it to listen to smartphones, iPod®MP3/ CD Players, radio, or television!
